

Academy Snapshot

Sharing what Ten10 Junior Consultants are working on

Hi everyone, I'm Sam, and I joined Ten10 as part of Academy 31 in September 2023. After completing core training and several additional training courses, I was placed with Croda in April 2024 as a Junior Product Owner for 11 months. Since March of this year, I have been on the bench, working independently to upskill myself.

My current goal is to take the BCS Foundation exam, so I am working my way through the BA 4th Edition textbook. I have also achieved the Professional Scrum Master I (PSM I) and Professional Scrum Product Owner I (PSPO I) certifications since being on the bench.

On a typical day, I will log on to check any emails and messages, planning for the day ahead, before joining our bench stand up call at 9am. The stand up is a useful time to touch base and report back on what we are working on. I then get to work on studying for BCS; I try to break up the study with practice papers and video content so that the book doesn't get too much!

Motivation can be a bit of a challenge when on the bench. To combat this, I try to come into the Leeds office every Wednesday so that I can be in a working environment. I also enjoy being able to touch base with colleagues when I come to the office. I make sure to exercise frequently to clear my head and make sure I am fresh and motivated.
