Academy Snapshot

Sharing what Ten10 Junior Consultants are working on

I'm a Product Owner on a large-scale enterprise transformation programme, focused on improving integrations and simplifying how systems communicate across the organisation. The initiative is part of a wider digital transformation designed to strengthen governance, increase efficiency, and build a more scalable, connected enterprise.

My role is end-to-end and highly collaborative. I work closely with stakeholders to define requirements, prioritise features, and shape the product vision in line with business goals.

Hannah Parker | Academy 37

A typical day involves sprint planning, backlog refinement, stakeholder sessions, and ensuring that delivery teams remain aligned on outcomes and value.

The project follows a SAFe Agile framework, balancing structured governance with flexible, iterative delivery. It's a fast-paced environment where adaptability, clarity, and communication are key. I primarily work remotely but regularly attend on-site planning and strategy sessions to maintain alignment and drive progress.

A key challenge has been overcoming change resistance and encouraging stakeholders to think beyond short-term workarounds toward sustainable, long-term solutions. Building trust and demonstrating early wins have been crucial in maintaining momentum.

I use tools such as Jira, SAP, and M365 for delivery management, documentation, and collaboration across multiple teams and workstreams.

My biggest achievement so far has been revitalising team collaboration and governance, bringing renewed focus, structure, and energy to a complex programme - helping the organisation move confidently toward a more efficient, future-ready operating model.
